Data Dashboard

Navigation Guide for Building Administrators

Entering the Data Dashboard

In your chosen browser, please visit <http://dashboard.canyonsdistrict.org/>. Use your **email credentials** to log in to the dashboard.

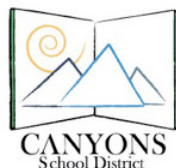

The screenshot shows a web browser window with the URL <https://dashboard.canyonsdistrict.org/>. The page features the CANYONS School District Data Dashboard logo. A black box contains the text: "PLEASE NOTE: You need to enter your district provided username and password to proceed." Below this, there are input fields for "User Name:" (containing "kelly.dumont") and "Password:" (masked with dots). A "Login!" button is at the bottom. Two red arrows with text annotations are present: one pointing to the URL bar labeled "Login URL" and another pointing to the password field labeled "Use email credentials here".

Student Search

The Student Search fields at the top of the screen make it simple to search for specific students. Enter the student's name there and click the *Search* button or press the return key on your keyboard to be directed that student's information.

The screenshot shows the "Search For Students" interface. At the top, there are input fields for "Last Name" and "First Name", followed by a search icon. A "Signed in as: kelly.dumont" status is shown with a "Logout" link. Below the search fields is a navigation bar with tabs: "Home", "Canyons District", "Elementary Schools", "Middle Schools", "High Schools", and "Special Schools". The "Middle Schools" tab is selected, displaying data for "Butler Middle". The data is organized into two columns: "Demographic Counts" and "Grades".

Demographic Counts	Grades
Total Enrollment: 907	
Special Ed(Resource): 79	
Special Ed(Self Contained): 19	Grade 7: 291 Grade 9: 299
Low Income: 200	Grade 8: 317
English Language Learners: 14

Customizing Views

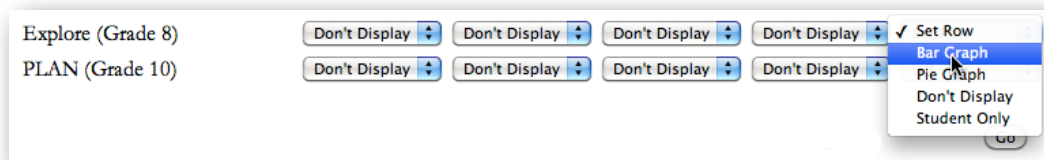

Several different buttons are provided on every screen of the dashboard that allow you to customize your viewing experience. The Hide/Show buttons for graphs and students give you more or less detail - depending on your preferences - and the Select Display Options button takes you into a section where additional preferences can be set. When viewing only your school's data, a Hide/Show button for courses becomes visible.

While the Hide/Show buttons allow you to toggle what sections you see directly onscreen, the *Select Display Options* buttons take you to a different screen. From the *Dashboard Display Options* screen, you can choose which data you prefer to be displayed.

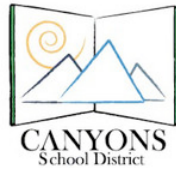

Dashboard Display Options

For graphs, the display options are: Bar Graph or Pie Graph. With the Pie Graph you can choose to display percentages, values or both. You may also choose not to display any of the information. For Explore/Plan/ACT and AIMS Web Assessment Data you may set the information by row, meaning (for example) that you prefer that all Explore data be shown as a Bar Graph.

You may also choose to hide all the graphs by selecting the *Set All Graphs* button, on the left side of the screen. Additionally, you may select a default view for an entire grade level. Once you've selected the data you want and how you want it displayed, click on any one of the *Go* buttons on the screen to view the data.

(For convenience, there are several *Go* buttons on the screen. A click on any one of them will do the same thing.)

Data Dashboard

Navigation Guide for Building Administrators

Building Level Data

As a building administrator, you will have the ability to drill down into any data related to your school. For other buildings, only the ability to view graphs of grade-level data will be available.

Canyons School District
Demographic Counts

- Total Enrollment: 33304
- Special Ed(Resource): 2731
- Special Ed(Self Contained): 1019
- Low Income: 9367
- English Language Learners: 1601

Search For Students
Last Name First Name

Navigation: Home | Canyons District | Elementary Schools | **Middle Schools** | High Schools | Special Schools

Middle Schools Dropdown:

- Middle School Summary
- Albion Middle
- Butler Middle
- Eastmont Middle
- Midvale Middle
- Indian Hills Middle
- Crescent View Middle
- Mount Jordan Middle
- Union Middle

Grade Level Data (Visible in Dropdown):

Grade	Count
Grade 3	2665
Grade 4	2625
Grade 5	2712
Grade 6	2501
Grade 7	2474
Grade 8	2516
Grade 9	2374
Grade 10	2670
Grade 11	2453
Grade 12	2176

You may now adjust or select the data you want to see for your school.

Courses Listing

At the school level, courses may be displayed. At the elementary level, this means teachers. For secondary schools, this means individual courses. The courses section displays grade levels, teacher names, and student counts.

Courses | Hide Courses | Select Display Options

Show 10 entries | Search:

Grade	Teacher	Stu Count
0	[Redacted]	9
0	[Redacted]	14
0	[Redacted]	48
0	[Redacted]	21
1	[Redacted]	25
1	[Redacted]	22
1	[Redacted]	23
2	[Redacted]	26
2	[Redacted]	10
2	[Redacted]	22

Showing 1 to 10 of 23 entries

Page Navigation: First | Previous | 1 | 2 | 3 | Next | Last

Keep in mind that when showing only 10 entries at a time, you may need to view multiple pages in order to see all courses/teachers available. Page markers at the bottom of the Courses table identify options.

Data Dashboard

Navigation Guide for Building Administrators

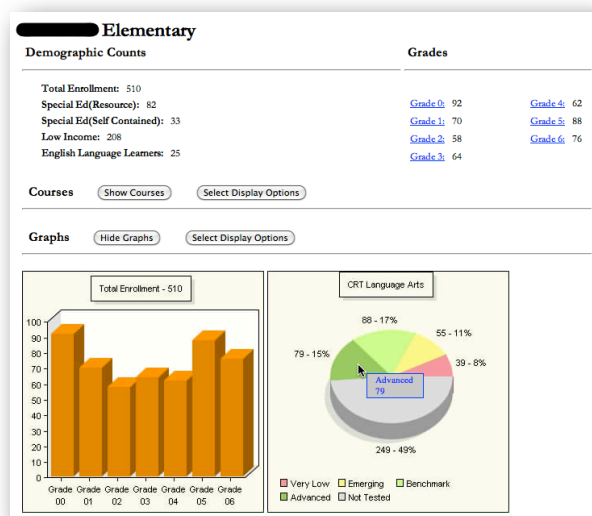

Using the *Search* field located directly above the *Courses* listing provides valuable information. You may perform a search on courses, teacher names, and grade levels (enter a number). Once you have found the course or teacher you want to examine, you may select that course or teacher and their class data will be displayed.

Sorting

Information in any listing can be sorted (by ascending or descending order) by clicking on the column headers. Furthermore, shift-clicking on additional columns will continue to sort across subsequent variables. For example, you could begin by sorting by grade level (click on the *Grade* column header), then sort within that grade level by Student Count or any other variable (click on the column header while now holding down the shift key).

Graphs

Graphs throughout the Data Dashboard provide a quick view of demographic and academic information.

When viewing graphs for any group's data (including District, School, and grade-level groups), hovering over a wedge or bar on any graph reveals specifics. Pie graphs can be helpful when attempting to compare samples with an entire population. Bar graphs lend themselves to displaying data over time.

Students Listing and Individual Student Display

Unless you've chosen to *Hide Students*, a listing of students within your selection or group will appear at the bottom of the page (you may need to scroll down). From this view, the student's picture, ID, name, grade, school, and other data you may have selected to display are shown. (On the Dashboard Display Options screen, choosing to view a graph for any particular variable will also enable its data to appear as a column in the Students listing.)

Clicking on a student's photo or Student ID will then take you to the *Individual Student Display* screen. Within this screen a wide variety of academic and other data can be seen for each student.

Student ID: [REDACTED]
Grade: 3
Days Absent: 6
Times Tardy: 11
Cumulative GPA: 0

Criterion Reference Tests (CRT)

Test Description	Score	
Language Arts	173	History
Mathematics	180	History

Scholastic Reading Inventory (SRI) [Cut Scores](#)

Last Test Date	Score	Percentile
----------------	-------	------------

AIMSweb Assessment and Data

Test Description	Fall Score	Winter Score	Spring Score	
Reading - Curriculum Based Measurement (R-CBM)	85	93	112	History
Math Computation (M-COMP)	30	59	67	History

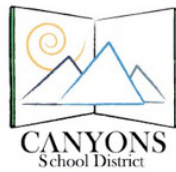

Explore / Plan / ACT [Cut Scores](#)

Test Description	English Score	Reading Score	Math Score	Science Score
------------------	---------------	---------------	------------	---------------

To learn more about specific data points, simply click any blue link. Links to test score *History* will provide data graphed over time (when available for selected students), while links to *Cut Scores* will display additional explanations about the meaning of scores presented.

Moreover, please note the following:

- *Report Cards* are often available for students in secondary schools (link located to the right of the student's photo).
- *Days Absent* indicates the number of days that students have been absent over the course of the entire school year.
- *Times Tardy* indicates the number of times that students have been tardy over the course of the entire school year. Some schools have one, four, and seven potential times a student might be tardy in any given school day.
- Blank data in any field simply indicate that particular scores are not available.

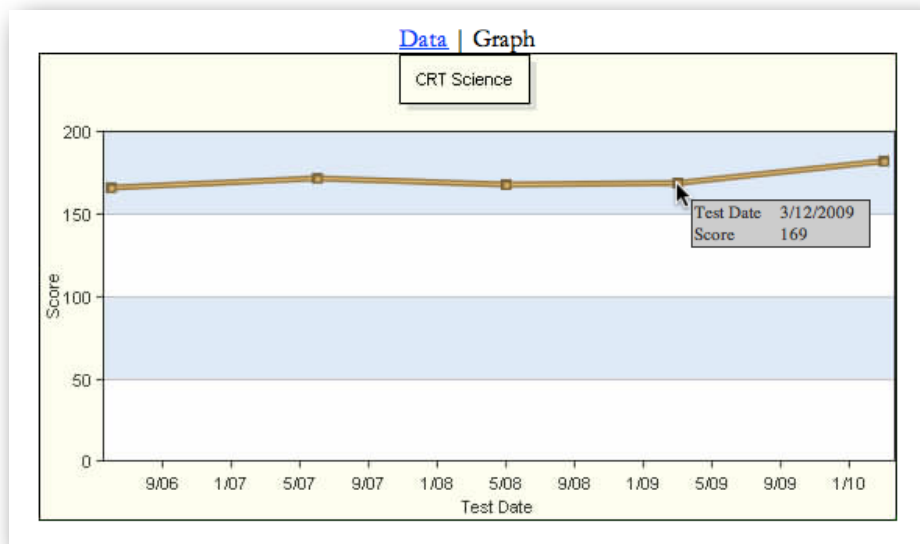

Data Dashboard

Navigation Guide for Building Administrators

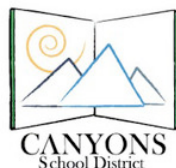

History

Anywhere a link to History is found on the Individual Student Display, you can click on it to view the available history for that measurement. Hovering over the data points on available graphs will give you the exact score or measure for that point.

Clicking on the *Data* link above the graph will also present a table view of available data, with additional specific information related to each data point.

Data Graph		CRT - Science			
Date	Score	Proficiency	Year	Description	
06/05/2006	166	Lv 3: Sufficient	2006	SC0404	
06/01/2007	172	Lv 4: Substantial	2007	SC0505	
05/30/2008	168	Lv 4: Substantial	2008	SC0606	
03/12/2009	169	Lv 4: Substantial	2009	SC0707	
03/04/2010	182	Lv 4: Substantial	2010	SC0808	

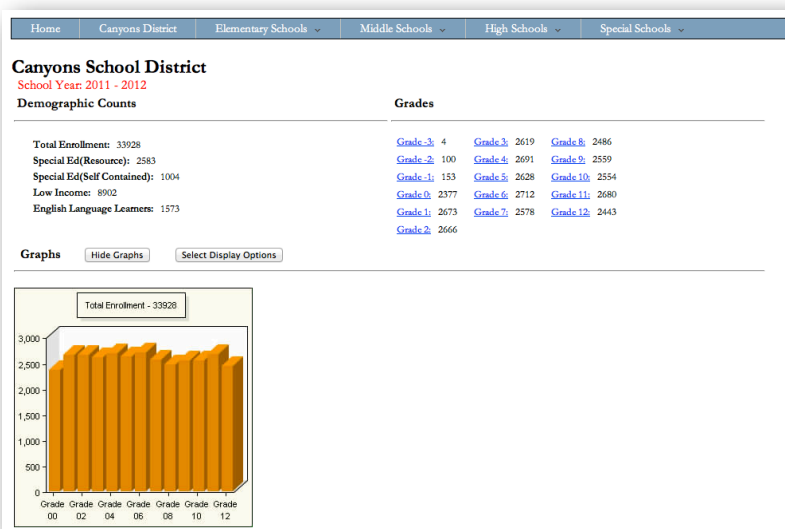

Data Dashboard

District Level Data

Clicking on the Canyons District link from the menu bar at the top of the screen will provide you with a District-wide, all-grade-level view of the data (just as whole school data may be viewed by selecting the appropriate entity from the blue drop-down menus). Updated nightly, this screen will give you current demographic information for all schools. Furthermore, if you want to see the same data for a specific grade level, simply select that grade from the list by clicking its link.

Note that the sub numbers (Grades -1, -2, -3) indicate various Pre-K programs offered within the District.

In conclusion, we hope these basic tips for navigating the Data Dashboard help you to better understand the system. Other materials will be provided to help you know how to interpret the data you encounter.
