

IS THIS YOU? PEEKIN' PETE

When you take your eyes off the copy, you lose speed because it takes time to search for the keys and then find your place in the book, again and again. Also, you may not always find the right spot in the text, and

that causes errors. Force yourself to *think* where the keys are, rather than *look* for them. With practice you'll soon learn their location, and both your speed and accuracy will improve.
