# Scaffolded Instruction and Grouping

Differentiate students' learning and create student groups using technology!
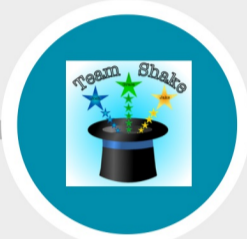

Canvas

Create groups for collaborative projects and assign differentiated assignments to students. Also use quiz statistics to analyze performance data of students.
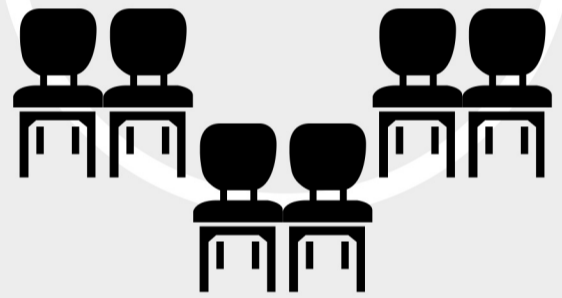

Team Shake

Use this app to create groups randomly, by gender, or skill level.

Skyward

Create different seating charts to allow for varied groupings.

## Newsela

Access a plethora of articles. Each article can be accessed on five different lexile levels. Writing prompts and quizzes are also available.
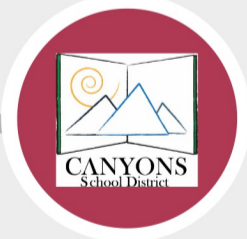

CSDDocs

Allow pairs or groups of students to work on the same document simultaneously.

Data Dashboard

View and analyze a variety of data on all of your students to make informed grouping and instructional decisions.

Blendspace

Compile a variety of resources on different levels of a concept into one online lesson. Then, use the quiz feature to track understanding and provide further differentiated instruction.

Stick Pick

Randomly pick students to answer questions. Use differentiated question stems to individualize the levels of questions each student is asked. Track accuracy and and depth of understanding.
