Improving Instruction Through the Skillful Use of Technology

Engagement and OTR

Feedback

Grouping

Nearpod

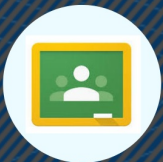

Let your slideshows become interactive with periodic quizzes, discussions, etc. to actively engage students.

Receive instant data during instruction to provide individual and whole class feedback.

Stick Pick

Randomly pick students to answer questions, or perform different tasks.

Google Classroom

Include discussions, assignments, and collaboration into your lesson plan. Incorporate Nearpod presentations

Project discussions and assignments during class for verbal feedback.

Randomly

Use this iPhone app to call on random students or create random groups in seconds.

Reflector

Wirelessly stream and project your devices from the palm of your hand. Students can also connect their devices.

During whole group instructions, students can receive instant verbal feedback.

Group Maker

Create diverse groups of students allowing for groups of 1-20.

Today's Meet

Create a private online chat where students can send in questions, comments, or answers to questions during instruction.

Share out answers or comments from the discussion feed or respond to students in the chat.

Team Shake

Use this app to create groups randomly, by gender, or skill level.

Poll Everywhere

Ask students questions using the app and they respond using any device with Internet access.

Responses are viewable to participants live or can be embedded in a presentation.
